PROFESSIONAL SUMMARY

Computer Science Engineering student (Graduating 2027) with hands-on experience developing scalable full-stack web applications and AI-powered automation solutions using Python, Java, JavaScript, React.js, Node.js, Express.js, and SQL. Skilled in designing and integrating REST APIs, developing reusable and maintainable software solutions. Strong foundation in DSA, OOP, DBMS, and problem-solving, with a passion for developing innovative software and learning modern technologies.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Database: MySQL, SQL, MongoDB

Frontend: HTML, CSS, Bootstrap, React.js

Backend: Node.js, Express.js, REST APIs

Tools & Platforms: Git, GitHub, VS Code, Tableau, Jupyter Notebook

Core CS Concepts: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

AI & Machine Learning: Prompt Engineering, LLM Applications, AI Agent Development

Data Analytics & BI: Excel, Power BI, Tableau, Pandas, Matplotlib, Seaborn, Data Cleaning, Data Visualization, Numpy

PROJECTS

Personalized Multi-Agent Orchestration System for Google Workspace

Jan 2026 – Present

Python, REST APIs, Google Workspace APIs, Node.js

[Github](#)

- Engineered an event-driven multi-agent system enabling automated email summarization, smart scheduling, and document workflow management across Gmail, Google Drive, and Google Calendar.
- Developed an AI-powered multi-agent orchestration system using LLMs to automate email summarization, intelligent scheduling, and document workflows across Gmail, Google Drive, and Google Calendar.
- Integrated Google Workspace REST APIs for seamless communication between services and automation modules.

Exploratory Data Analysis in Telecommunications

Nov 2024 – Jan 2025

Python, Pandas, Matplotlib, Seaborn, SQL

[Github](#)

- Performed exploratory data analysis on a telecom dataset of 50,000+ customer records to identify behavior patterns and churn indicators.
- Used Python libraries and SQL queries to analyze network usage, service quality, and customer trends, identifying high-risk customer segments.
- Built Tableau dashboards to visualize churn trends, customer segmentation, enabling data-driven decision making

AI-Powered Learning Path Generator using n8n

Mar 2026 - Present

n8n • AI Agents • Workflow Automation • REST APIs

- Built an AI-powered learning path generator using n8n and Google Gemini to automatically create personalized day-wise learning plans.
- Integrated SerpAPI, Google Docs, and Google Calendar APIs to automate resource discovery, document generation, and learning schedule management.
- Developed a multi-service workflow leveraging AI agents and REST APIs to streamline educational planning through end-to-end automation.

CERTIFICATIONS

Full Stack Web Development – freeCodeCamp (2024)

React – The Complete Guide – Udemy (2024)

The Complete Node.js Developer Course – Udemy (2024)

COMPETITIVE PROGRAMMING & TECHNICAL ACTIVITIES

- Solved 200+ coding problems on competitive programming platforms, focusing on Data Structures and Algorithms.
- Participated in college-level coding contests and technical problem-solving events.
- Maintained active GitHub repositories showcasing full-stack and automation-based projects.

VOLUNTEER EXPERIENCE

Volunteer – Rural Development Trust (RDT)

July 2023

Contributed 45 days of community service assisting local schools with educational support and conducting hygiene awareness programs. Collaborated with volunteers and communities to improve outreach effectiveness in education, healthcare, and rural development initiatives.

EDUCATION

Parul Institute of Engineering and Technology

2023 – 2027

Bachelor of Technology – Computer Science Engineering | CGPA: 7.56

Relevant Coursework: DSA, OS, DBMS, Networks

Race IIT Academy – Intermediate | 91%

2022 – 2023

Sri Vyshnavi High School – Matriculation / SSC | 100%

2020 – 2021
